3. As per claim 26, Wiser et al. discloses a method of acquiring and playing digital content(see col. 3, lines 5-10), acquiring a physical electronic key(i.e. passport)(see col. 4, lines 15-18) containing key code from a key provider(see col. 4, lines 12-18, fig 1B, sheet 2, ref #110); requesting digital content from a content provider(see col. 4, lines 12-27, 51-67, col. 11, lines 46-48); after locking the digital content with an unlock code associated with the key code contained in the physical electronic key(see col. 5, lines 11-17), receiving the locked digital content(see col. 5, lines 11-17, col. 8, lines 46-53); and entering the locked digital content into a playing device that reads the key code and determines whether the key code is associated with the unlock code, the device being enabled to unlock code(see col. 8, lines 46-56).

4. As per claim 27, Wiser et al. discloses the step of acquiring the physical electronic key includes providing the key provider with user identification for use by the key provider in

Claim Rejections - 35 USC § 103

23. ***The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:***

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

24. Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wiser et al in view of Hasegawa.

25. Wiser et al. does not disclose wireless communication. However, Hasegawa does disclose wireless communication(see col. 3, lines 22-39). It would have been obvious to one of ordinary skill in the art to combine Wiser with Hasegawa, because Wireless communication can be used without the use of wires or cables.
